## Summary

I work in the field of graphic design, website design and development, setting up an online store, making and editing promotional teasers in the form of filming or motion graphics, industrial and advertising photography, producing graphic content for websites and social networks.

- Logo design, product packaging, billboard and banner design, exhibition elements, catalogs and brochures, etc.
- Corporate, personal and store websites - with dedicated coding or based on WordPress with a dedicated template
- Implementation and compilation of promotional teasers with a professional team to broadcast on TV networks or social networks to introduce the brand, product and services along with professional equipment.
- Carrying out specialized SEO and website optimization projects
- Designing and implementing motion graphics projects to introduce brands, products and services
- Creative, self-motivated Web Designer, Information Architect and Usability expert with 17 years of extensive and diverse experience in a number of large-scale and interactive projects.
- Expert XHTML, HTML5 & Hand-Code CSS-CSS3 developer, highly experienced in Standard Web Design and table-less layouts.
- Expert PHP/MySQL developer, experienced in several opensource projects, Wordpress, SocialNetworking, etc.
- 2D and UI graphic designer with 17 years experience.
- SEO expert
- Highly qualified in most graphics and video editing softwares, including Adobe Photoshop, Adobe Illustrator, Adobe Premier pro, Adobe After Effect, FinalCut Pro, etc.
